UNIVERSITY OF COLORADO **BOULDER**

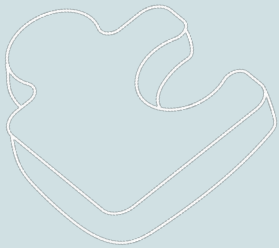

Agenda

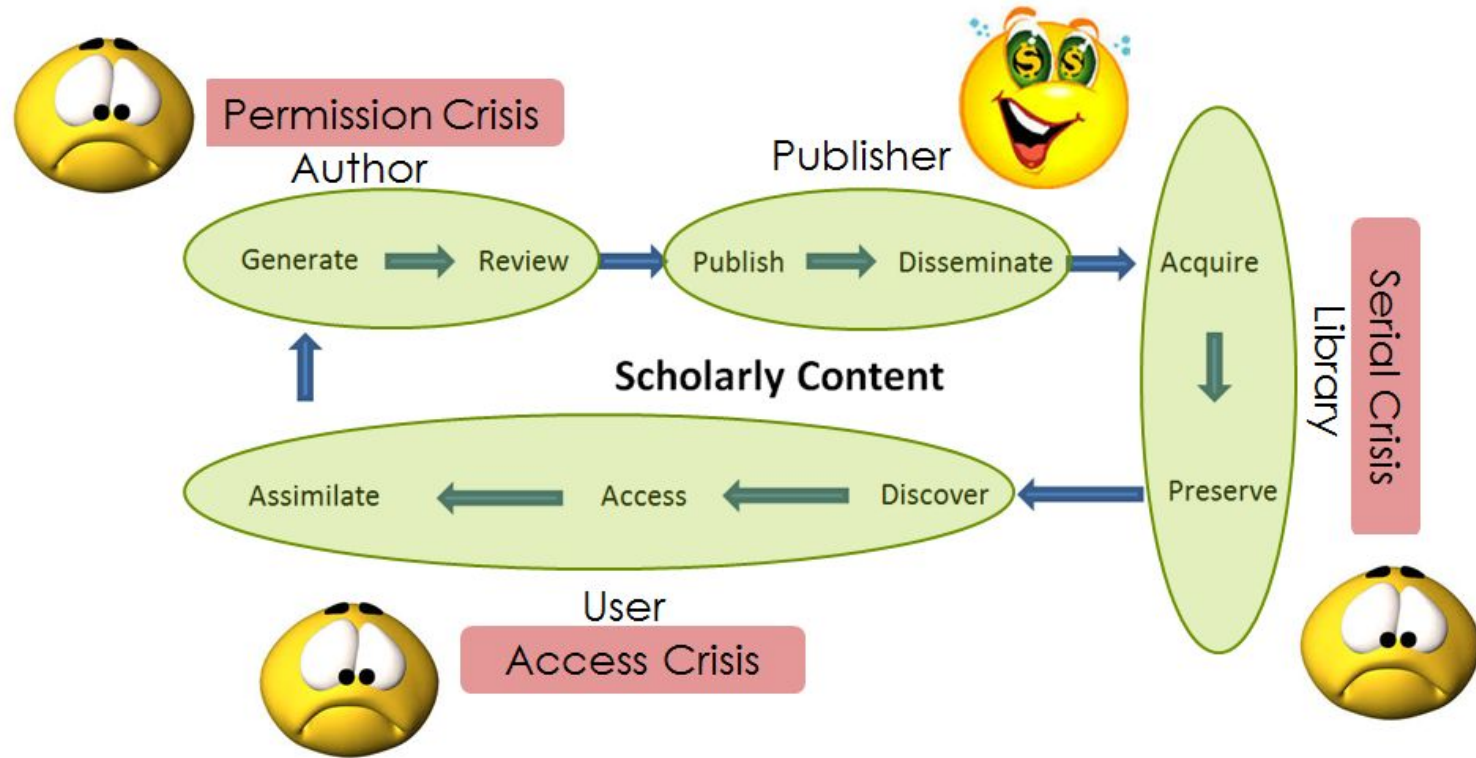

1. How did we get here?
2. Author's Rights
3. Enter Open Access
4. Pathways to OA at CU Boulder

1. How did we get here?

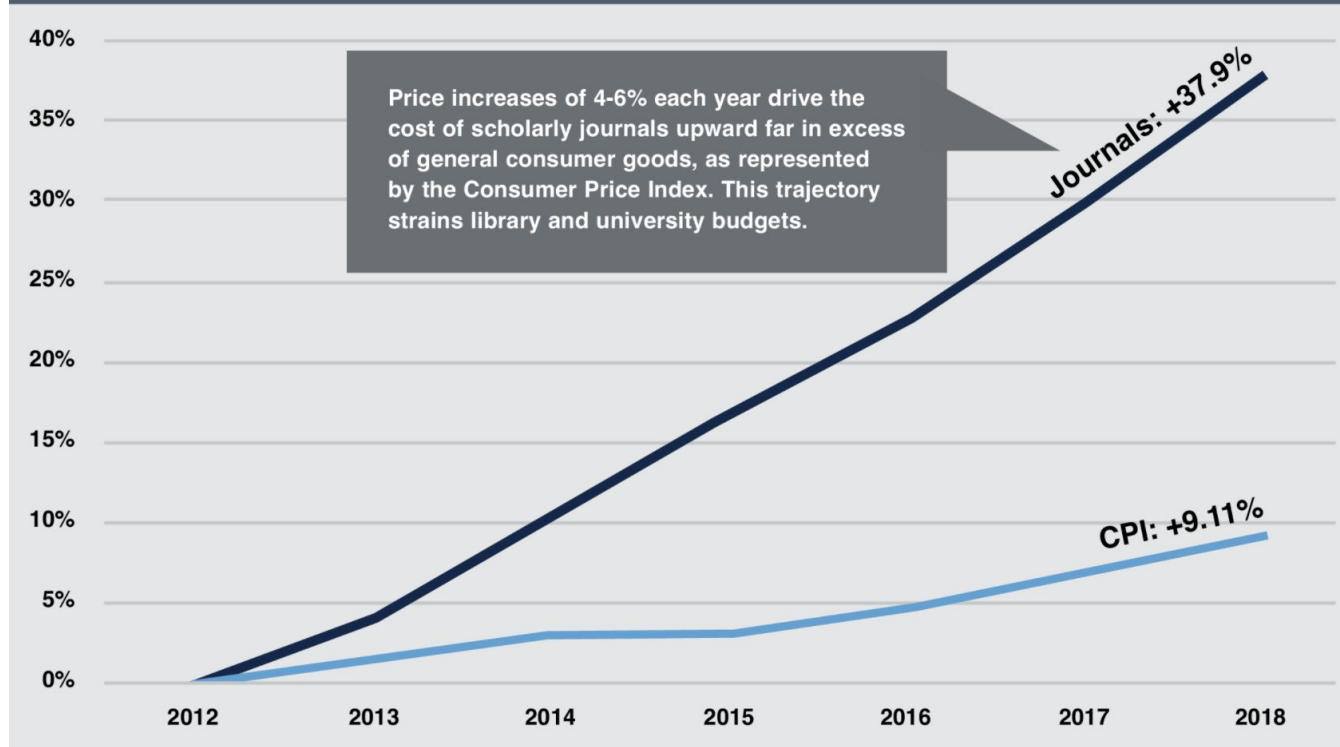

The scholarly communication system is bonkers...

Here's another way to look at it...

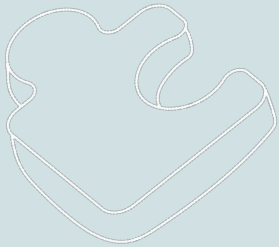

Cumulative Inflation 2013-2018

This imbalance is compounded by price increases far in excess of inflation...

2. Author's Rights

What?

The exclusive right to:

- Reproduce,
- Perform,
- Prepare,
- Display,
- Distribute, and
- Grant permission for others to use the work.

When?

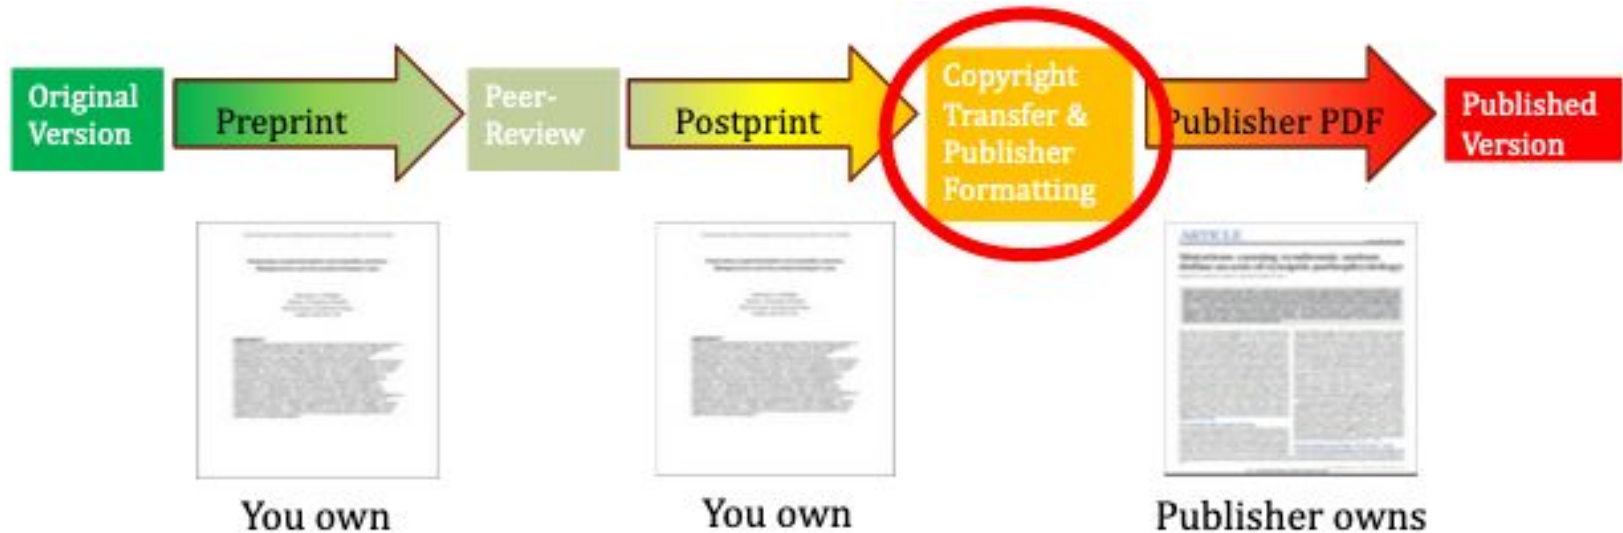

As soon as the work is created in a material or persistent form

Authors' Rights

=

Copyright

How copyright transfer works

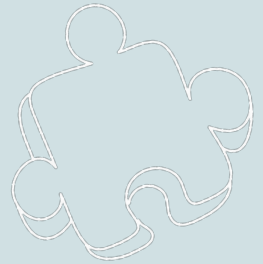

Copyright Agreements have
ensured the publishers'
ability to profit from
scholarly works...

While researchers and scholars serve as the supply, the labor, as well as the demand for the publishers' means of production.

3. Enter Open Access

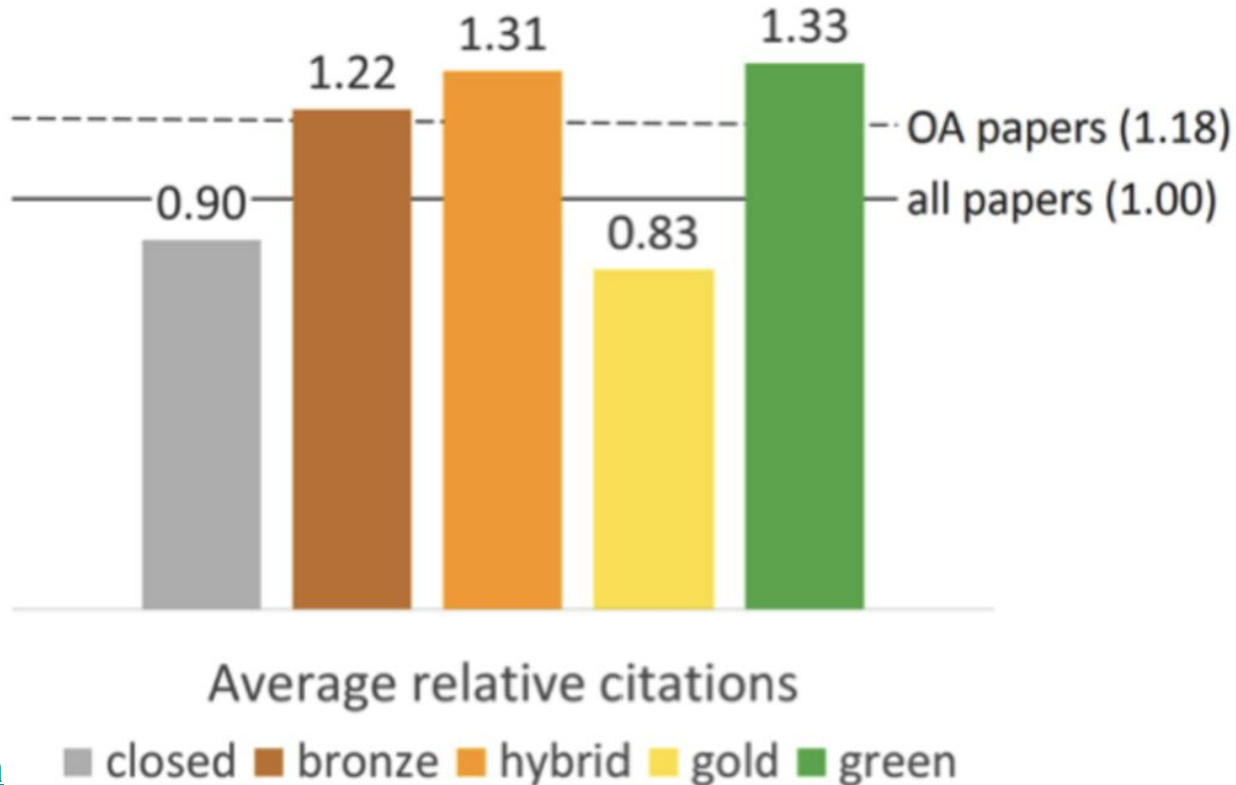

Importance of Open Access

Publishing open access allows for
more retention of authors' rights

Impact and Visibility

Studies show 3x the downloads of non-OA and a 30-50% citation advantage for OA

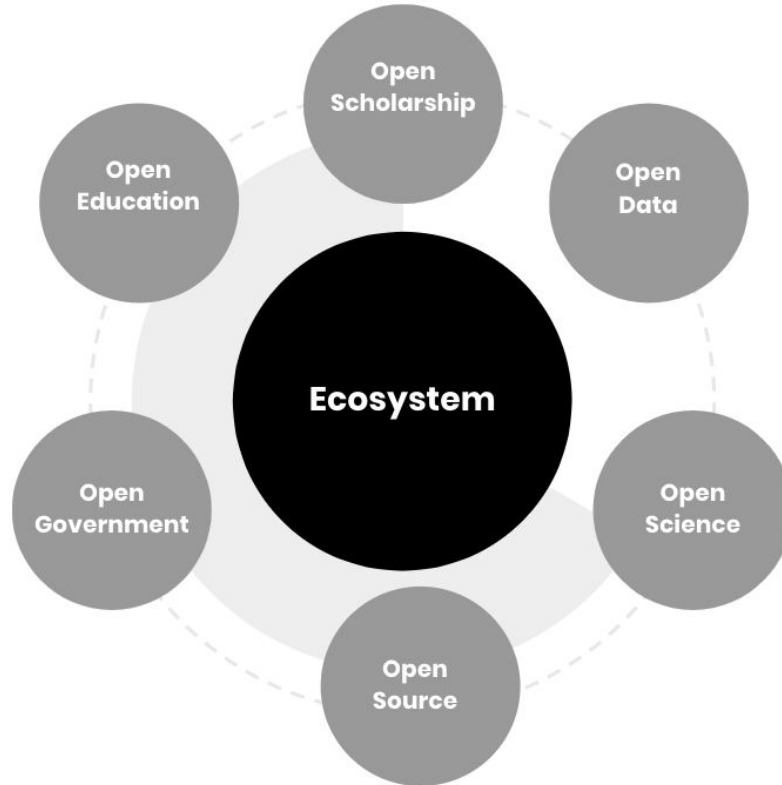

Open Access still has a cost...

4. Pathways to OA at CU Boulder

“Open” is an ecosystem

Two major pathways to Open Access

Green Open Access: Self-Archiving

Gold Open Access: Journal Publishing

Open Access Self-Archiving

Versions of your work

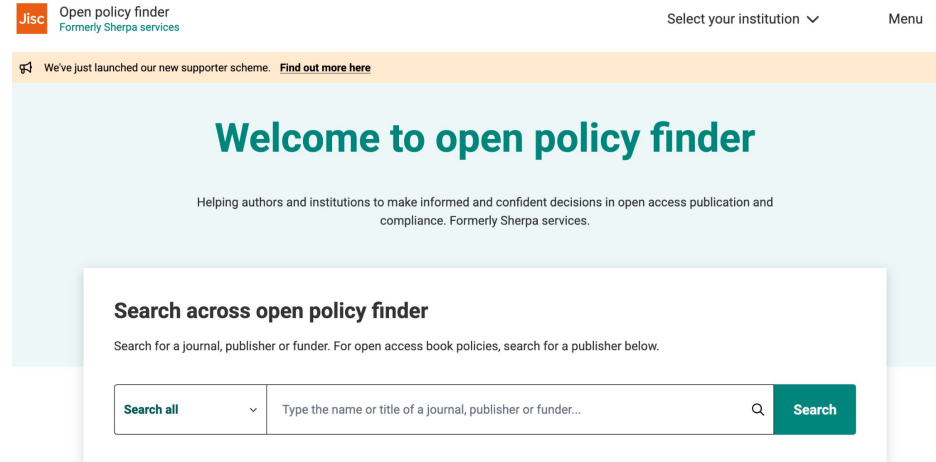

Preprint	Postprint	Publisher's Version
Version of manuscript that was submitted, but prior to peer-review changes	Version of manuscript that includes peer-review changes, but is prior to publisher formatting/ designs/ logos, etc.	Final, published version of the work, with publishers' markings and formatting.

Open policy finder

<https://openpolicyfinder.jisc.ac.uk/>

Aggregates journal sharing policies from around the world.

Can tell you what version of your work you can share, and when and where you can share it.

The screenshot shows the Open Policy Finder website. At the top, there is a header with the Jisc logo, the text "Open policy finder" and "Formerly Sherpa services", a "Select your institution" dropdown menu, and a "Menu" link. Below the header is a light orange banner with a small icon and the text "We've just launched our new supporter scheme. Find out more here". The main content area has a light blue background with the heading "Welcome to open policy finder" in a large, bold, teal font. Below this heading is a smaller line of text: "Helping authors and institutions to make informed and confident decisions in open access publication and compliance. Formerly Sherpa services." In the center of the page is a white search box with a teal border. Inside the search box, the heading "Search across open policy finder" is followed by the instruction "Search for a journal, publisher or funder. For open access book policies, search for a publisher below." Below the instruction is a search input field with a teal "Search all" button on the left, a dropdown arrow, and a teal "Search" button on the right. The input field contains the placeholder text "Type the name or title of a journal, publisher or funder..." and a magnifying glass icon.

University Libraries

I. Policy Statement

In order to allow for broad dissemination of their research, the faculty grant to The Regents of the University of Colorado, a body corporate, on behalf of the University of Colorado Boulder a nonexclusive, irrevocable, worldwide license to exercise any and all rights under copyright relating to their scholarly work, as long as the works are properly attributed to the authors and not used for commercial purposes. The nonexclusive nature of this license allows faculty to retain full ownership of the material, including the right to further publish it where they wish.

Faculty shall inform publishers about this policy and that they have granted a pre-existing License. This policy with the University may serve to help negotiate with publishers that require an exclusive right to publish.

Faculty will provide the Libraries with electronic copies of the final version of the author's peer-reviewed manuscript or published version of their scholarly

Open Access Publishing

CU Boulder has agreements with all of the following publishers:

ELSEVIER

IOPscience

If none of our existing agreements work for you...

\$2,000 per fiscal year
(July-June)

All CU Boulder
faculty, staff, and
students are
eligible

Journal must be
FULLY open access
and peer-reviewed

Apply upon
acceptance of the
article

Open Access Fund

Funding for FY25 has been depleted and the Open Access Fund is closed. The Open Access Fund will re-open in July 2025.

The University Libraries support the goal of making CU Boulder research findings immediately and freely available worldwide via publication in open access journals. See the [CU Boulder Open Monograph Fund](#) for information about support for monographs.

The Open Access Fund is intended to support that goal by providing a means for authors without access to funds from other sources to pay for reasonable article processing or publishing fees charged by full open access publishers.

**We support
open access
monographs
too!**

1. Faculty only
eligible for now
2. Up to \$15k
3. Conditions apply
for publishers
4. Editor needs to
apply
5. No textbooks or
works of fiction
