Q&A

Introduction to Scholarly Communication

The scholarly communication system is bonkers ...

Here's another way to look at it ...

Authors ' Rights = Copyright

What?

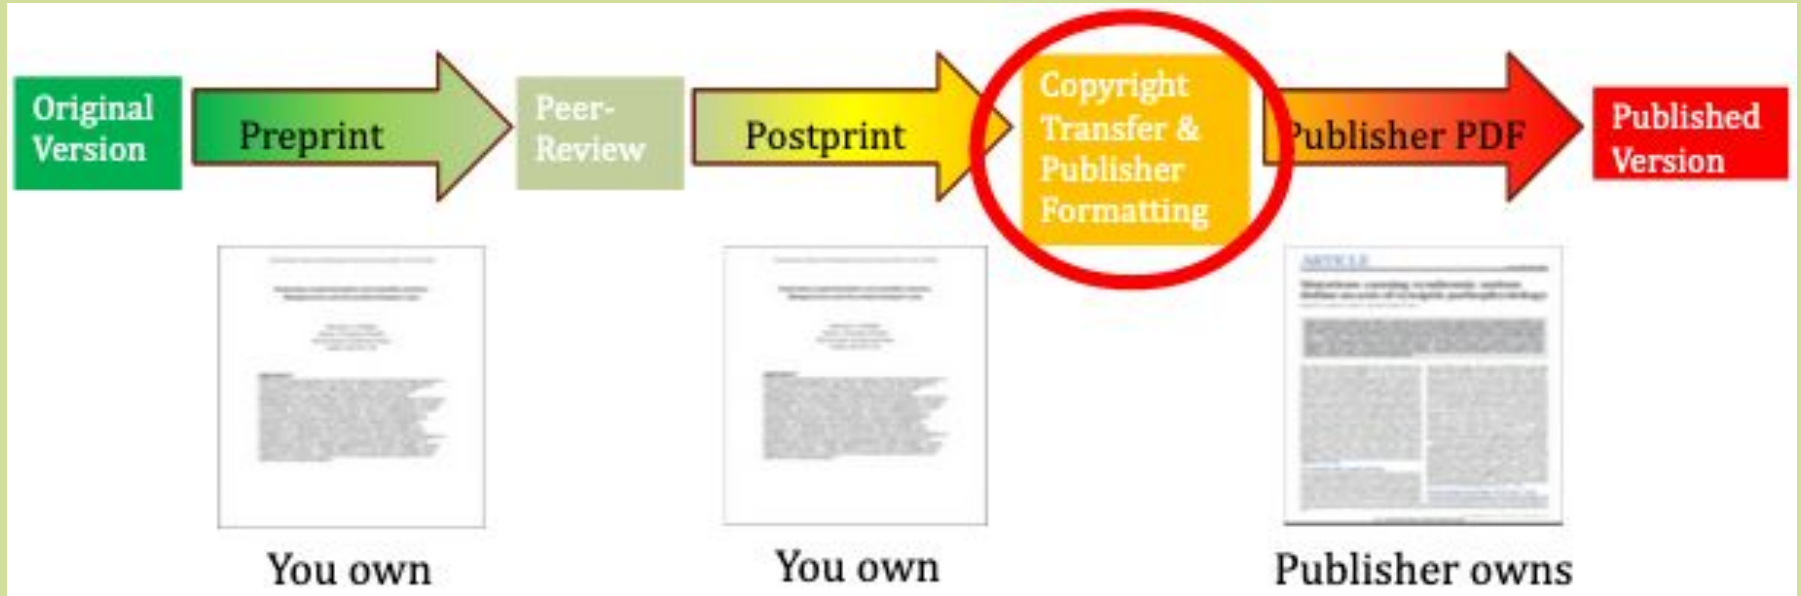

The exclusive right to:

- Reproduce,
- Perform,
- Prepare,
- Display,
- Distribute, and
- Grant permission for others to use the work.

When?

As soon as the work is created in a material or persistent form

Copyright Transfer

Copyright transfer agreements have ensured publishers' ability to profit from scholarly works.

Enter Open Access

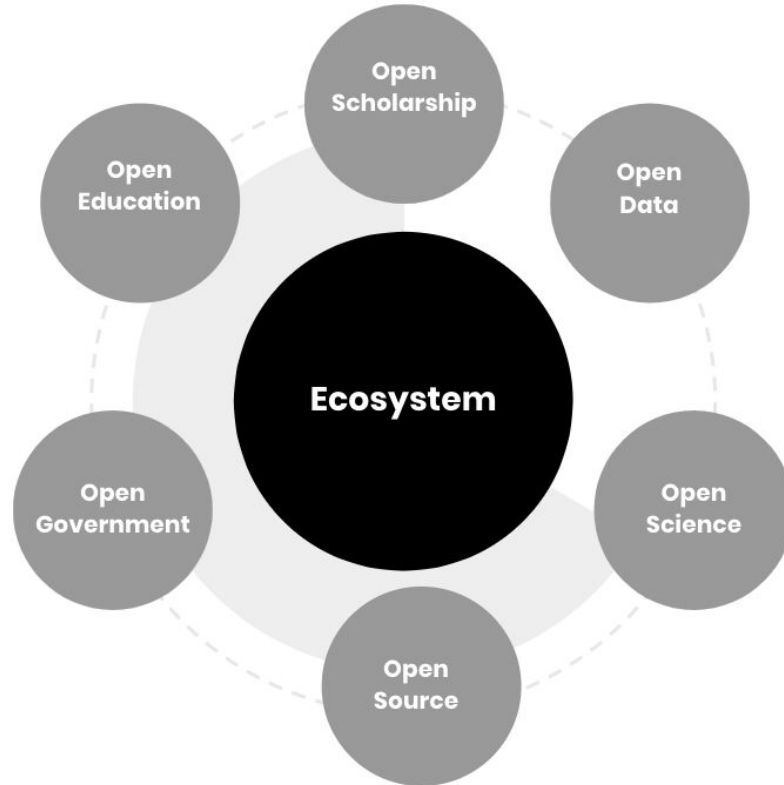

Importance of Open Access

Publishing open access allows for
more retention of authors ' rights

“Open” is an ecosystem

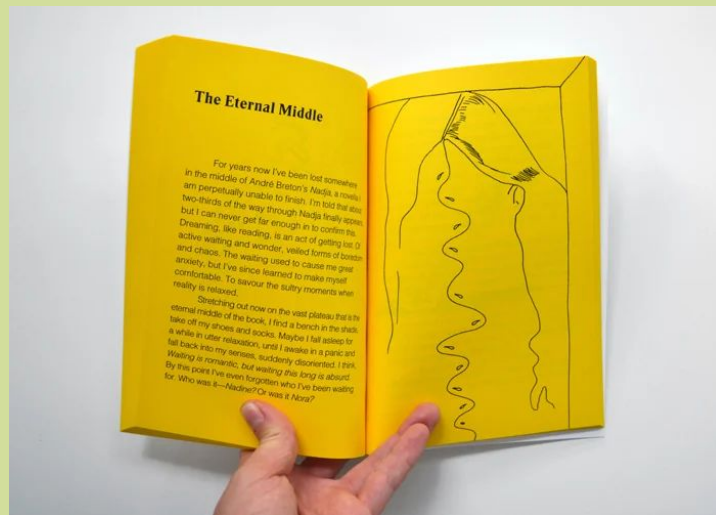

Pathways to Open Access at CU Boulder

Two major pathways to OA

Green Open Access – Self-Archiving

Gold Open Access – Journal Publishing

Open Access Self-Archiving

Versions of your work

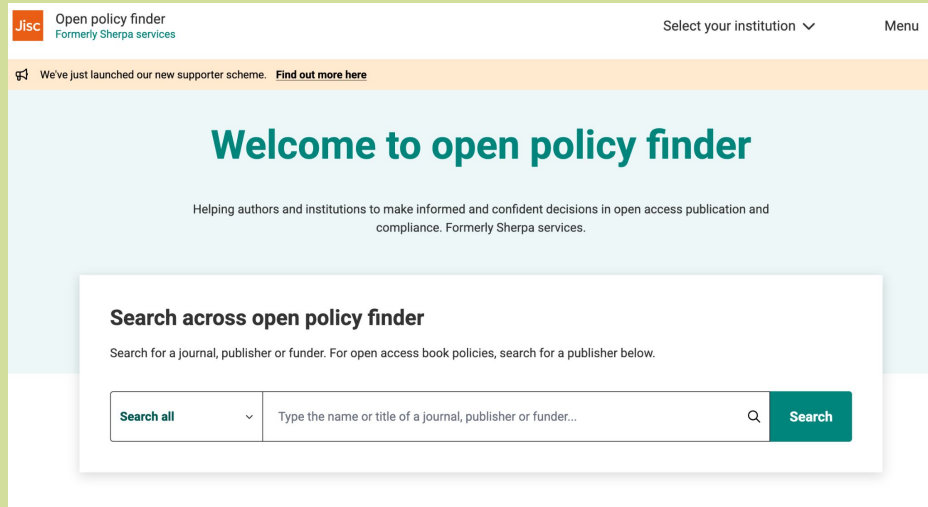

Preprint	Postprint	Publisher's Version
Version of manuscript that was submitted, but prior to peer-review changes	Version of manuscript that includes peer-review changes, but is prior to publisher formatting/ designs/ logos, etc.	Final, published version of the work, with publishers' markings and formatting.

Open policy finder

<https://openpolicyfinder.jisc.ac.uk/>

Aggregates journal sharing policies from around the world.

Can tell you what version of your work you can share, and when and where you can share it.

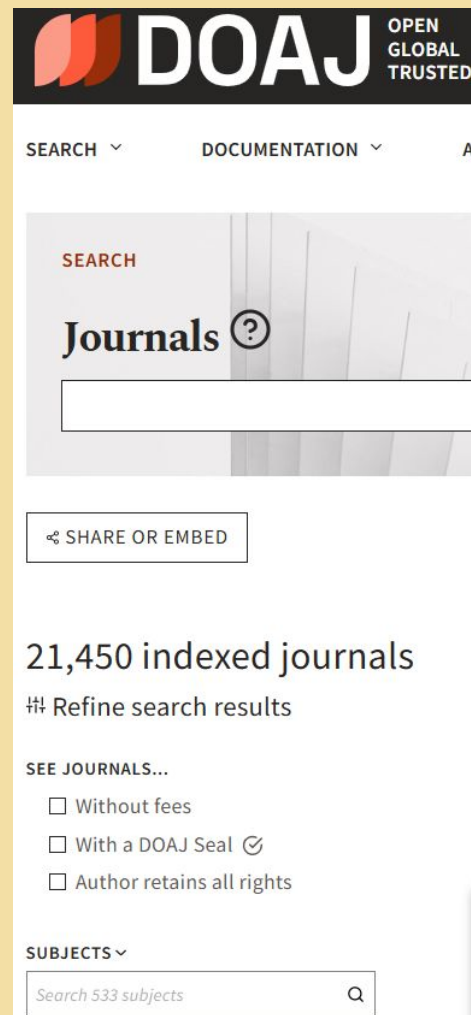

The screenshot shows the Open Policy Finder website. At the top, there is a header with the Jisc logo, the text "Open policy finder" and "Formerly Sherpa services", a "Select your institution" dropdown menu, and a "Menu" link. Below the header is a light orange banner with a small icon and the text "We've just launched our new supporter scheme. Find out more here". The main content area has a light blue background with the heading "Welcome to open policy finder" in teal. Below this is a subtitle: "Helping authors and institutions to make informed and confident decisions in open access publication and compliance. Formerly Sherpa services." In the center, there is a white search box with the title "Search across open policy finder". Inside the search box, it says "Search for a journal, publisher or funder. For open access book policies, search for a publisher below." At the bottom of the search box, there is a "Search all" dropdown menu, a text input field with the placeholder "Type the name or title of a journal, publisher or funder...", a magnifying glass icon, and a teal "Search" button.

Open Access Journal Publishing

If you'd like to make your work OA by publishing in a fully OA Journal, a great place to start is by searching DOAJ for a journal relevant to your work.

You can also use the search filters to browse for journals that don't have fees, for journals that allow you to retain your author rights, and to browse by subject.

CU Boulder has agreements with all of the following publishers:

ELSEVIER

IOPscience

How to make use of agreements

1. Use our [OA Funding Recommender](#) to identify publishers/journals covered
2. Make sure a CU Boulder author is corresponding author
3. Corresponding author should use their CU Boulder email, and if applicable, select their institution as CU Boulder
4. Some agreements are opt-in and some are opt-out, so make sure necessary selections are made

How the Libraries considers/negotiates agreements

- Costs and sustainability
- Publisher dedication to transitioning to fully OA models
- Author copyright retention – non-negotiable
- Impact to CU Boulder authors
- Timing
- Collaboration with other campuses and university consortia
- Workflows and administrative burden
- We'd love to hear suggestions from you!

If none of our existing agreements work for you...

\$2,000 per fiscal year
(July-June)

All CU Boulder
faculty, staff, and
students are
eligible

Journal must be
FULLY open access
and peer-reviewed

Apply upon
acceptance of the
article

Open Access Fund

Funding for FY25 has been depleted and the Open Access Fund is closed. The Open Access Fund will re-open in July 2025.

The University Libraries support the goal of making CU Boulder research findings immediately and freely available worldwide via publication in open access journals. See the [CU Boulder Open Monograph Fund](#) for information about support for monographs.

The Open Access Fund is intended to support that goal by providing a means for authors without access to funds from other sources to pay for reasonable article processing or publishing fees charged by full open access publishers.
